LOW PROFILE ELECTRONIC CARD HOLDER AND DEVICE USING SAME

ABSTRACT OF THE INVENTION

A memory card tray (206) includes a low profile design having a flat outside ledge (302) that allows for the memory card tray (206) to be welded flush to the electronic device. Angled leading edges (304) help with the insertion of the memory (SIM) card (102). A ramp (305) found in the trailing edge of the tray (206) provides for easier removal of the SIM card (102) via an access opening (106) found in the electronic device's battery floor.
